

CASH FLOW CHECK

Track and Manage Your Daily
Expenses like a Pro.

01

Want to manage your expenses?

Our CashFlowCheck web
app will help you in keeping
track of all your expenses,
with just few clicks.

Features.

Personal Profile

You can create your own personal profile and track your data in the personal dashboard.

Add and track

With just few clicks you can add and update your expense data. That'll be uploaded to your assigned database.

Account Creation

With easy account creation pages, you can signup and login to our web app seamlessly. With just few clicks.

Tech Stack Used.

HTML/CSS

For good, structured pages and clean UI we used HTML and CSS. To provide the best user experience possible.

JavaScript

For seamless integration between frontend and backend, and to make our website active, we used JavaScript related techniques.

FireBase

To store the data provided by our users and to server the client on frontend side, we used FireBase as our database.
